

CHANGE IS IN YOUR HANDS

European Assortment
2024:1

Biopak
It doesn't cost the earth

BE THE CHANGE YOU DREAM OF

For everything to stay the same, everything must change. At BioPak, we aim to provide people with viable, sustainably designed packaging solutions, making it possible to preserve the planet and achieve commercial success at the same time.

BioPak
It doesn't cost the earth

THE LIFECYCLE OF A BIOPAK PRODUCT

There is no Planet B. We never lose sight of this fact – which is why we carefully consider the lifecycle of everything we create.

We seek out the best plant-based materials in terms of functionality, resource-efficiency and environmental impact. Reflecting this, we offer a range of proven recycled, recyclable and compostable materials - many of which carry Ecolabels.

We also work hard to ensure that our products and services meet stringent environmental and social standards. Part of this process involves designing for the most responsible use of resources possible and auditing our suppliers.

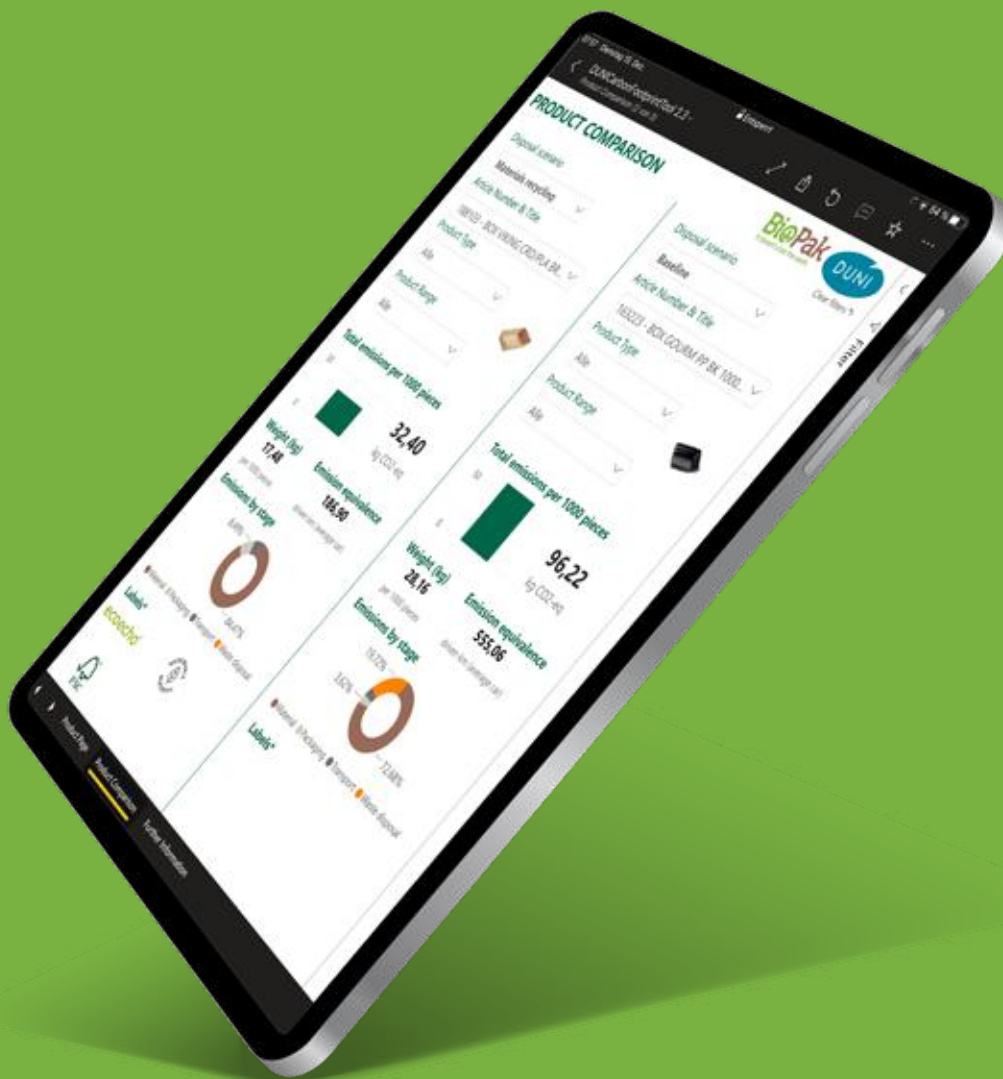

If we, as a society, want to preserve and protect the planet, we need a world where end-of-life means new life. For that to happen, people need to be able to make more informed choices. And that's why, in addition to all of the efforts mentioned above, we've also created an innovative tool that makes it easier for people to choose optimal solutions based on end-of-life options in their region.

KNOW YOUR NUMBERS CUT YOUR FOOTPRINT

At BioPak we look forward to the day when comparing carbon footprint is as natural as counting calories or checking ingredients. In the meantime, our CO₂-calculator, developed in collaboration with leading experts in the field of environmental calculations, is one way we're accelerating progress toward that goal. The tool enables you to:

1. Compare the carbon footprint of different types of BioPak packaging.
2. Receive advice on end-of-life possibilities.
3. Minimize your environmental impact with confidence.

RESPONSIBLY SOURCED MINDFUL MATERIALS

Our experienced design team uses responsibly sourced, high-quality materials. These work to ensure a smooth, reliable experience for workers and customers while minimising environmental impact.

Sugarcane Fibre/Bagasse

Rapidly renewable, compostable material also known as bagasse. By-product from sugarcane production with a low carbon footprint.

Paper/Paperboard/Cardboard

Compostable and recyclable as paper pulp if not contaminated by food. Most of our paper based products are made from FSC™-certified fibre.

Wood/Bamboo

A renewable resource. We use FSC-certified Birchwood and bamboo for our products.

Recycled PET (RPET)

Made from recycled plastic bottles. Recyclable in the same stream as PET.

PLA/CPLA

Compostable plant-based bioplastic made from fermented corn starch. Produced from surplus renewable material.

Grass Paper

Grass paper is recyclable and extremely resource-efficient. Grass is naturally abundant, available globally and harvested locally.

KNOW YOUR BIOPAK PACKAGING SYMBOLS

Here you can see the symbols shown in this brochure and read about what they mean.

Disposal

Compostable

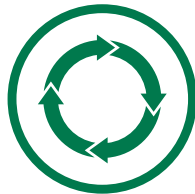

This symbol identifies packaging that is independently certified as either home or industrially compostable according to the standard EN 13432. Industrially compostable certified products will disintegrate within 84 days and biodegrade within 180 days in industrial composting conditions. Certified home compostable products will biodegrade within 365 days in home composting conditions. We list the certification standards and our unique certificate number.

Product materials

Responsibly sourced

To ensure our forests are protected forever, we only use raw materials from responsibly managed plantations, including FSC™-certified plantations.

Renewable material

To preserve the planet, we use renewable natural materials, which can be replenished as fast as they are used up.

Recycled material

To limit environmental impact, we use recycled materials. For instance, RPET is made from recycling plastic.

Product features

Customisable

To help you grow your brand, our experienced team is here to assist with profile printable products.

New product

To keep our customers ahead of the latest market trends, we keep creating eco-conscious new products. Look out for this symbol.

Product features

Stackable

To simplify service and save precious space, we offer a number of solutions that are designed for optimal stackability.

Microwave safe

To ensure you choose the best solution for your menu, we note which packaging is microwave safe.

Oven safe

To ensure you choose the best solution for your menu, we note which packaging is oven safe.

Sealable

Sealable to elevate hygiene and convenience. Suitable for sealing with a Duniform® machine.

Antifog

To ensure delicious-looking displays and rewarding customer experiences, we offer a selection that resist condensation.

CERTIFICATIONS THAT INSPIRE CONFIDENCE

The products in our collection carry a variety of environmental and quality certifications. Here you can find out what they mean.

THE FOREST STEWARDSHIP COUNCIL™ (FSC)

The Forest Stewardship Council™ (FSC) certification ensures the product is made of wood from forests managed in an environmentally appropriate, socially beneficial and economically viable manner.

The mark of responsible forestry

NORDIC SWAN ECOLABEL

The Nordic Swan Ecolabel works to reduce the environmental impact from production and consumption of goods, with strict requirements in all relevant phases of a product's life cycle.

OK COMPOST INDUSTRIAL / SEEDLING

The OK Compost INDUSTRIAL label and the Seedling label indicate that the product is suitable for industrial composting and meets the stringent requirements of the European standard EN 13432.

OK COMPOST HOME / DIN-GEPRÜFT HOME COMPOSTABLE

The OK Compost HOME label and the DIN-Geprüft Home Compostable label indicate that the product can be composted at home, for instance by putting it on the compost heap in your garden.

FLUSTIX

Flustix is a sustainability label for plastic-free and partially plastic-free products. The Flustix "PLASTIC FREE PRODUCT" certification ensures that the product is free from plastic as defined by strict criteria.

GOOD FOR THE PLANET

When you choose BioPak packaging, you choose a brighter vision for the planet. We provide a broad range of recyclable solutions made from renewable, OK Compost-certified and FSC™-certified materials. Compared to conventional alternatives, these offer a lower carbon footprint and reduce the use of fossil-based plastic. Even better, they point the way to a more socially responsible world.

GOOD FOR BUSINESS

The circular economy can only become a reality if we, as a society, create business tools that are both viable and sustainable. At BioPak, we never lose sight of this fact. That's why every solution we offer combines environmental thinking with outstanding design, superior quality and proven materials. What's more, we match our packaging with services like our best-in-class profile print offer.

THERE IS NO PLANET B

BioPak started life in Australia as a group of pioneers with a powerful vision: to make the best eco-conscious packaging on the market. Now part of Duni Group, we act as trusted partners to foodservice professionals across the globe.

As we push on with our mission, we comply with the ISO Environmental Standard and certify that most of our ranges are either home and/or industrially compostable.

OUR PRODUCTS

For packaging material, the carbon footprint of the product is consistently lower than for the goods they protect. For plastic products, transportation typically represents less than 10–15 % of the overall footprint, also when shipped from China to Europe.

Calculations show that for BioPak products with the same use, bagasse and paper products have the lowest carbon footprint.

PRODUCTS NOW PRODUCED WITH NO ADDED PFAS

Find out why we're removing PFAS from all BioPak packaging and how it impacts your food service.

Full production stop as of January 1st, 2024

PFAS has been an industry standard for bagasse products for its ability to prevent oil and grease from leaking through food packaging. But the recent unearthing of the substance's negative effects has led to regulations on its use and an uptick in national bans.

The impact on people and the planet – coupled with PFAS bans – made us put a full stop on the production of products with added PFAS on January 1st, 2024. To keep communications clear and transparent, we have changed article numbers on affected products.

How will it affect you?

PFAS has been found in most of our bagasse products as well as some grass paper articles. While there is no tactile or visual difference between products with and without added PFAS; there's a difference in how they perform – especially in contact with very wet and greasy food.

Bagasse is a sustainable and rapidly renewable material with a low carbon footprint, but it's not a natural repellent. Through extensive research and development, we've developed an alternative oil-based barrier solution to replace the PFAS additives previously used. The shift away from PFAS has resulted in new performance profiles and recommended uses for our bagasse products. As such, it's important that you pair your food with the right products.

What is PFAS?

PFAS (Per- and polyfluoroalkyl substances) is a large and complex group of over 10,000 identified substances that hold the ability to repel water and grease as well as withstand high temperatures. Although PFAS is widely used in anything from raincoats to frying pans and firefighting foam; it's been uncovered as a "forever chemical" that can contaminate soil and water.

RECOMMENDED USE NO ADDED PFAS

Pair your food with the right boxes and bowls to get the best use out of the non-added PFAS assortment.

Examples of food	How to use*	Uncoated	Coated

CUBE

Combining simplicity and functionality, Cube is a timeless classic. The square and rectangular shapes are perfect for efficient space utilization and the rounded edges add a sophisticated look. Made from renewable bagasse, the boxes can be recycled after use. Cube can be used safely with all types of hot and cold food and thanks to an extra secure lid closing, it ensures the best possible food protection. Transparent lids made from 100% post-consumer recycled PET (RPET) with an anti-fog feature to prevent condensation are available when clarity is a priority. The coated Cube range features an ultrathin PBAT/PLA coating designed to withstand greasy food, long-term storage and microwave reheating.

Our Cube range is produced without any added PFAS – just like all our plates and bowls.

CLAMSHELL

Our Clamshell boxes are the optimal fast-food choice. Made from renewable and compostable bagasse, they are as sustainable as they are practical. They come in several sizes and compartment divisions, making preparation and serving a piece of cake. Our Clamshell range is produced without any added PFAS – just like all our plates and bowls.

PIZZA

Looking for a unique, trendy, and sustainable way to deliver your pizza, we have the perfect solution for you. Made from renewable and certified compostable bagasse, with its eye-catching round design (just like your pizza), stackability and grease resistance, our pizza box is the packaging your pizza deserves. Our Pizza range is produced without any added PFAS – just like all our plates and bowls.

VIKING

The Viking concept combines FSC™ certified paperboard with a plant-based PLA lamination. The lids pop open with no folding required while the boxes' tapered edges ensure strong leak-resistance – a significant advantage over conventional paperboard boxes.

RONDA

Like nature, the new Ronda take-away range comes in all shapes and sizes. The paper bowls and lids are FSC certified and compostable, and can also be recycled as paper after use. The optional transparent lids are made from 100% post-consumer recycled PET (RPET), and can be recycled again after use.

CRYSTAL DELI

Our Crystal Deli range give new life to what otherwise would have been waste. Made from crystal clear 100% post-consumer recycled PET (RPET), they are the ultimate solution when you want to show off the beauty of your food and be sustainable at the same time. With its convenient sizes and matching one-size-fits-all lid, the Crystal Deli range has got you covered. Easily recycled again once used.

HINGED DELI

Our Hinged Deli range gives new life to what would otherwise have been waste. Made from crystal clear 80% post-consumer recycled PET (RPET), they are the ultimate solution when you want to show off your food and be sustainable at the same time. With its convenient sizes and hinged lid, the Hinged Deli range keeps your food chilled, protected and looking delicious. Easily recycled again once used.

CUTLERY

PLUMA

Meet Pluma, an innovative and truly unique cutlery range, designed to offer a great eating experience and produced with one focus in mind – the good of our environment. The name Pluma comes from the Latin word for feather which symbolizes the softness and smoothness of our cutlery, providing for a pleasant eating experience with full focus on the food.

CUPS

MELLI CUPS

The Melli Cup is made from renewable, FSC™ certified paper and decorated with a honeycomb pattern artwork. Coated with water-based lamination, the Flustix-certified Melli range is available in single and double wall made to serve beverages hot and cold. Top up the cup with the matching paper lids for a safe, sealed and sustained experience.

ART SERIES

Designed with the planet and the arts community in mind, our Art Series cups feature eye-catching artwork that explores sustainability themes. They are made from paper sourced from managed plantations and are coated with a plant-based PLA bioplastic. Together with their corresponding lids, they are certified industrially compostable.

CUSTOMISATION

Personalise your success

Your brand, and the responsible materials we use to create our packaging, both have a story to tell. Put them together and you'll be able to provide satisfying customer experiences and grow your business.

Our experienced customisation team is standing by to help you personalise your success. We can support you every step of the way from creation and artwork to manufacture and delivery.
